What is Nextcloud

A content collaboration platform under your control!
Why

- Most of our work happens on the computer
- More and more people work remote or with external partners/customers
- While working remotely there is a huge need for collaboration and communication tools
Questions you should think about

- **Where** is your data stored?
- **Who** has access to it?
- **What** happens with your data?
- **Which** jurisdiction will be in charge, in case of an incident?
Questions you should think about

- **Where** is your data stored?
- **Who** has access to it?
- **What** happens with your data?
- **Which** jurisdiction will be in charge, in case of an incident

→ **Nextcloud** gives you **peace of mind** for all this questions!
